REVENUE GENERATION MODELS — HOW EACH SYSTEM EARNS

SG Singapore LTA

Singapore · Revenue Score: 90/100

Fare Revenue **Retail Concessions**
API Data Licensing **Advertising**

Non-fare revenue ~30% of total operating income
(retail concessions, advertising, property, tourist
passes, data services)

CH Zürich SBB/ZVV

Switzerland · Revenue Score: 85/100

Fare Revenue **SwissPass Licensing**
Freight Operations **Real Estate**

SBB ~CHF 9B annual revenue; ~40% non-
passenger. Note: SBB also receives federal
infrastructure subsidies for network maintenance.

GB London TfL

United Kingdom · Revenue Score: 88/100

Fares (Oyster/Contactless)
Congestion Charge **ULEZ** **Advertising**

Non-fare target £1B+/yr; Congestion Charge
(~£280M) and ULEZ (~£200M) in benchmarked
period

[See full revenue analysis →](#)

JP Tokyo JR East

Japan · Revenue Score: **92/100**

[Fare Revenue](#) [Suica Payment Fees](#)

[Station Retail \(Lumine\)](#) [Hotel Operations](#)

Approx. ¥1.5T annual revenue (benchmark year); non-rail >40%

[See full revenue analysis →](#)

[See full revenue analysis →](#)

KR Seoul Metro

South Korea · Revenue Score: **80/100**

[Fare Revenue](#) [T-money Transaction Fees](#)

[Station Retail](#) [Digital Advertising](#)

7M+ daily riders; station retail and advertising ~15% of operating revenue

[See full revenue analysis →](#)

[See full revenue analysis →](#)

MTA New York

USA — New York · Revenue Score: **75/100**

[Fare Revenue](#) [Government Subsidies](#)

[Congestion Pricing \(new\)](#) [Advertising](#)

Budget ~\$19B; fare covers ~35%; congestion pricing to add \$1B+

[See full revenue analysis →](#)

WMATA (DC Metro)

USA — Washington DC · Revenue Score: **60/100**

[Fare Revenue](#)

[DC/MD/VA Jurisdictional Funding](#)

[Federal Grants](#) [Joint Development](#)

Budget ~\$2.5B; fare covers ~25%; dedicated funding legislation passed by all three jurisdictions in 2018 (\$500M+ annually)

[See full revenue analysis →](#)

LA Metro

USA — Los Angeles · Revenue Score: **65/100**

[Fare Revenue](#) [Sales Tax \(Measure M\)](#)

[Federal/State Grants](#) [Express Lanes Tolls](#)

Budget ~\$7B; Measure M generates ~\$860M/year

[See full revenue analysis →](#)

NJ Transit

USA — New Jersey · Revenue Score: **50/100**

[Fare Revenue](#) [State Subsidy](#)

[Federal Grants](#) [Parking Facilities](#)

Budget ~\$2.8B; fare covers only 25-30%; COVID relief expiring

Made with IBM Bob · NJ Transit Benchmarking Research 2024

SOURCES & METHODOLOGY NOTES

Benchmark Scores: All scores (Technology, UX, Silo Integration, Revenue) are internal benchmark ratings produced by this NJ Transit Benchmarking Research 2024 study. They are not independently validated industry ratings. Methodology weighs each dimension equally across pre/during/post-transit phases.

Ranking Note: Tokyo JR East (88/100) is ranked #4 and Seoul Metro (86/100) is ranked #5 in accordance with their overall scores. Rankings reflect scores at time of research.

Revenue Data: Budget and fare recovery figures are sourced from agency annual reports and public financial disclosures for the benchmarked period. Singapore LTA revenue reflects operating costs covered by fares and non-fare streams; government capital funding under the New Rail Financing Framework (NRFF) is provided separately. SBB (Zurich) receives federal infrastructure subsidies in addition to its commercial revenues. All figures should be verified against each agency's most recent audited financials.

Key Sources: WMATA FY2024 Adopted Budget; MTA FY2024 Budget; TfL Annual Report 2023/24; JR East Annual Report; Seoul Metro Annual Statistical Report; Singapore LTA Annual Report; SBB Annual Report; LA Metro FY2024 Adopted Budget; NJ Transit Annual Report. London open data value per

2017 Deloitte/TfL study.

Congestion Pricing (MTA): NYC congestion pricing is projected in the benchmark to generate \$1B+ annually for capital investment capacity (via bonding). Toll revenue was projected at ~\$500–600M annually. The program launched in modified form in January 2025 after a temporary pause.
